

Eden Seminar about latest development in heat exchanger technology

Taken place on 17th January 2024 in Jakarta, the seminar held by **Far East Refrigeration Indonesia** and **ACR** as Eden dealer, discussed about how ongoing developments in heat exchanger were opening up new possibilities for energy saving and high efficiency in diverse applications across commercial and industrial segments.

In his opening speech, Mr. Hasanuddin Yasni from ARPI mentioned that it is crucial to have qualified infrastructure for refrigeration system, as the heart of cold chain.

Real-life examples of application that using Eden heat exchangers were also included, showing how Eden were delivering high heat transfer efficiency while significantly reducing energy consumption with our compact products.
